

N922CP Fueling

Effective immediately, N922CP will be fuelled to the bottom of the filler neck (tabs). This will leave 35 gallons of usable fuel for flight.

The purpose of this policy is to allow for an additional 108 lbs. of useful load for mission crew and cargo. If you are within weight and balance and require additional fuel for your sortie, please call Boca Aviation at (561) 368-1110 and ask them to top off the aircraft prior to your flight. Upon completion of your flight, please only fill the aircraft to the tabs.

The policy does not apply to ICs or Project Officers for multiple sorties during actual/training missions. At the completion of the mission, the aircraft should be fuelled to the tabs.

This Operating Instruction to be considered immediately rescinded should a contradictory regulation or supplement be issued by a higher echelon.

NICHOLAS C SACCO, Maj, CAP
Commander

OPR: DO

Distribution: Group 6 units/CC, DO, DOV, Pilots; Group 6 staff, FLWG/CC, DA, DO, DOV; N922CP AIF
